

# MVP GIA clinical-insomnia source preprocessing · no correlation tested

**A Source retention and exclusions**

**B Reported P versus CI-derived Z**

Historical-rule CI-derived Z assumes 95% log-scale Wald intervals; discrepancy is descriptive and does not filter rows.  
19,703,815 source rows; 826,027 retained. All source/reference hashes unchanged. No heritability or power gate passed.
