

Phenome-wide genetic correlation atlas (1/2)

Black dots: BH FDR < 0.05 across the fixed 1,200-test family.

Rows grouped by phenotype domain; correlated phenotypes are retained. Full labels in source table.

Phenome-wide genetic correlation atlas (2/2)

Black dots: BH FDR < 0.05 across the fixed 1,200-test family.

Rows grouped by phenotype domain; correlated phenotypes are retained. Full labels in source table.
